Subject: Re: Jack B. Parson Hot Springs Mine

Mr. Clark: The review has been assigned to Penny Berry. We went over the application a few minutes ago and found that some clarification/information is needed. These are:

1. Jack Parsons is DBA Staker then the notice must be signed by an officer of Staker. Persons authorized to sign are: J. Parson, G. Hickman, J. Woodruff, or D. Peterson.
2. The map should show the access road and the location of the topsoil stockpile.
3. The legal description shows the site in the NE part of the section, we need to look closer and see if it goes into the SE section. This is particularly important since the reclamation surety is in the form of a surety bond.
4. The reclamation surety submitted with the NOI was \$18,600. We escalate the surety amounts every year with published inflation factors. The amount should have been \$20700 escalated to 2010 or \$22,300 escalated to 2012.
5. Jed has come issues with the surety bond that he can provide greater detail on.

Penny had to leave for the day so I am providing you with these comments in an e-mail form. We will be detailing the above comments in a letter. Please call or reply if you need additional information.

Susan

Dear Mary Ann:

An additional small mine permit application, bond and application fee for the Hot Springs site were submitted to DOGM on Friday June 22. I wanted to confirm that you received the information, and that the application is complete.

Assuming DOGM has received all required information, please let us know when mining activities may resume. We will begin the application process for a large mine permit shortly. If you need more information or have a question on the permit application, please contact me at (801) 430-3116.

Sincerely,

Pat Clark
